

Opportunities and challenges ahead – Continuity and reliability needed with your business partners !

CHALLENGES behind and ahead

Over the last months, the entire world has faced an unprecedented period when our life conditions have been deeply changed, when the emergency was driving some decisions. We still think about how to land on and turn the challenges into opportunities.

Most of the calls have been about dealing with suppliers and partners to find a solution to be delivered the needed goods, components or raw materials. The key-factor has been quickly identified for a non-failure of the supply : more partnerships with flexibility and reactivity.

This period might have raised potential bottlenecks and weaknesses for part of the supply chain and service, whilst revealing strengths, reliability and safety focus for others.

Thanks to the established partnerships and their manufacturing sites, the Promepla experts have been continuously supporting the activity and the innovation for the medical devices and biopharma communities. Our teams were present for the customers to be delivered with the finest possible accuracy, our experts were besides the customers to support actively the innovation, our staff was delivering yet high-value products for critical care whilst ensuring the continuity of supply. Anything driven by safety focus.

PARTNERING OPPORTUNITIES AHEAD – Your decision

By having a multiple-site policy, back-ups wherever needed and reliable partnerships with the appropriate suppliers, Promepla has maintained and will carry on maintaining a high level of service to help and serve the community.

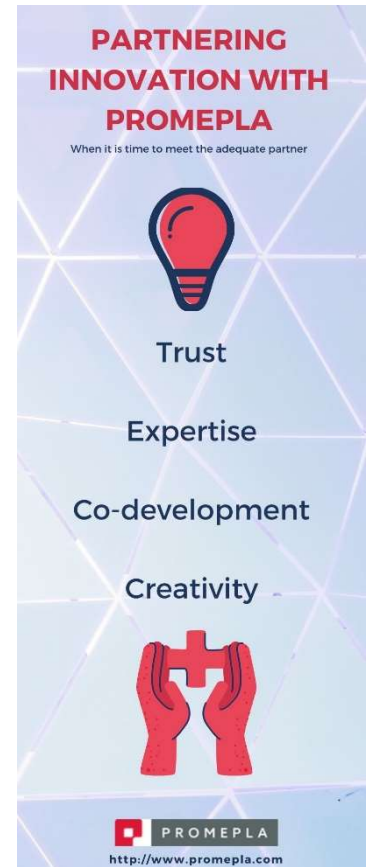

First partnering opportunity is about safety and supply chain.

Our manufacturing sites in France, Tunisia and Morocco ensure the business continuity plan with a safety focus. Any industrial topic is dealt with the highest attention. From raw materials supply to the sterilization logistics, Promepla has shown a strong experience with a sustainable expertise. Having 2-3 potential manufacturing sites and such a footprint is a key-factor that will drive your success.

Second partnering opportunity is about the service provided, innovation support, regulations.

Especially over the last months, Promepla experts have helped and supported the numerous projects they have been accountable of. Their expertise has been useful to successfully make projects becoming medical devices, following the applicable procedures and regulations, avoiding postponing or cancellation of the schedules.

Meanwhile, the MDR has been postponed to May 2021. The next innovations can be speeded up by considering the support Promepla can offer. Our partnership

P R O M E P L A

SOLUTIONS FOR SINGLE USE MEDICAL AND BIOPHARM DEVICES
