

## Jacques-Henry Grislain appointed CEO / Directeur Général of Monaco-Based Promepla Group

Headquartered in the Principality of Monaco, in the Fontvieille district, Promepla designs and manufactures single-use medical devices. The Group employs nearly 450 people and operates five production and assembly sites located in France, Germany, Morocco, and Tunisia. Promepla works with leading international customers as well as innovative start-ups to design and manufacture complex medical devices used in fields such as surgery, dialysis, dental care, ophthalmology, medical imaging, and nuclear medicine.

According to Michel Sasportes, President and Chairman, and Marc Danchin, Administrator, founders of Promepla: *"It is a decision we have carefully considered, reflecting our desire to provide Promepla with a clear long-term vision while continuing the Group's development."*

Jacques-Henry brings nearly 15 years of experience within international Private Equity investment funds, where he led investments in the healthcare sector, notably in orthopedic implant manufacturers such as Amplitude Surgical, as well as pharmaceutical laboratories including Ethypharm.

A graduate of MIT in Cambridge, USA, he gained early entrepreneurial experience during his studies by co-founding Mori, a biomaterials-focused start-up, alongside university professors.

He resides in the Principality with his Monegasque wife and is actively involved in community life. He lectures annually in finance courses at the University of Monaco, serves as a mentor and jury member at MonacoTech, and chairs the Sacrée Musique Monaco association, which organizes sacred music concerts in the Principality.
